Assignment

Practical Application of Lecture Concepts

Objective

The objective of this assignment is to reinforce your understanding of the concepts covered in today's lecture through hands-on practice. You will recreate the activities demonstrated in class to gain practical experience with React and Bootstrap and develop the skills needed to set up and run a basic React application independently.

Instructions

1. Review the Lecture Materials

- Review the lecture PDFs and examples to guide you through the assignment.

2. Install the Required Software

- Ensure that Node.js and all other tools required for React development are properly installed on your computer.

3. Create a React Project

- Use the command line to initialize a new React application.
- Make sure you are in the appropriate directory before creating your project.

4. Add Sample HTML Content

- Modify the default React application by adding sample HTML elements using JSX.
- Include elements such as headings, paragraphs, buttons, and containers to demonstrate the structure of your application.

5. Integrate Bootstrap

- Add Bootstrap to your React project using either a CDN link in your HTML file or installation through npm.
- Apply Bootstrap classes to some of your elements to demonstrate that Bootstrap is working correctly.

6. Run and Test Your Application

- Start your React application using the appropriate npm command.
- Open the application in your browser and verify that all elements are displayed correctly and Bootstrap styles are applied.

7. Submission

- Take a screenshot of your completed application running in the browser, clearly showing the HTML elements and Bootstrap styling.
- Submit your screenshot through Moodle before the assignment deadline.
- Include your full name in the submitted filename.

8. Grading Rubric (100%)

Assessment Criteria	Weight
React Project Setup: Successfully create and configure a React application.	20%
JSX Content: Add appropriate headings, paragraphs, buttons, and other elements using JSX.	20%
Bootstrap Integration: Correctly integrate Bootstrap and apply its CSS classes to style the application.	25%
Application Execution: Successfully run the application in a browser without errors.	20%
Submission: Submit a clear screenshot demonstrating the completed application and Bootstrap styling.	15%
Total	**100%**

- **Important:** Students must be able to demonstrate and explain their application during an in-person presentation to the instructor. The assignment will not be graded without this presentation.
